Education

PSNA College of Engineering and Technology — *Dindigul, Tamil Nadu, India*
B.E. Electronics and Communication Engineering | 2022–2026 | CGPA: 7.75/10

Skills Summary

Languages: Java, JavaScript, SQL
Frameworks: Spring Boot, Spring Data JPA, Hibernate, Spring Security, React
Databases: MySQL, PostgreSQL
Messaging & Caching: Kafka, Redis (caching and rate limiting)
Testing: JUnit 5, Mockito, Testcontainers
Cloud & DevOps: AWS S3, Docker, Docker Compose, GitHub Actions, Git, Maven, Postman
Security: JWT, BCrypt

Experience

Web Development — Virtual

CodSoft, Tamil Nadu, India *Jan – Feb 2025*

- **Task 1:** Created a vegetarian hotel landing page using React.js and Tailwind CSS.
- **Task 2:** Built a personal portfolio website to practice JavaScript and frontend development.
- **Tech Stack:** HTML, CSS, JavaScript, React.js, Tailwind CSS

Backend Development — Virtual

CodeAlpha, Tamil Nadu, India *July 2025*

- **Task 1:** Built a URL shortener with URL validation, generated short codes, redirection, and MySQL integration.
- **Task 2:** Developed an event registration system using Java Spring Boot and React.js, with JWT, Spring Security, REST APIs, and Postgre SQL.
- **Tech Stack:** Java, React.js, Spring Boot, Spring Security, REST APIs, SQL, JWT

Projects

CloudVault — Scalable Cloud File Storage Platform

Java, Spring Boot, PostgreSQL, React, Kafka, Redis, Docker, AWS S3, JUnit 5, Mockito, Testcontainers, GitHub Actions

- **Platform:** Building secure file storage with authentication, nested folders, uploads/downloads, quotas, and permission-based sharing.
- **Backend:** Designed REST APIs and PostgreSQL data model with constraints, indexing, pagination, and transactions.
- **Events & Storage:** Kafka asynchronous processing with retries/idempotent consumers; Redis caching/rate limiting and S3-compatible file storage.
- **Quality & Delivery:** Configuring Docker Compose, GitHub Actions, and unit/integration tests.

BMS-Clone — Movie Ticket Booking Platform

Java 17, Spring Boot, Spring Security, JWT, MySQL, React, Vite, Razorpay, Brevo API, Docker, Render, Aiven

- **APIs:** Built APIs for authentication, movie discovery, show selection, seat booking, and payments.
- **Security:** Implemented JWT, BCrypt, email verification, and role-based authorization.
- **Booking & Payments:** Built time-limited seat locks to prevent conflicting bookings; integrated Razorpay and booking status management.
- **Deployment:** Integrated Brevo transactional email; deployed frontend/backend on Render with MySQL on Aiven.

Deep Hybrid Model for Femoral Stem Classification

Python, PyTorch, ResNet50, CNN, ECA Attention, Transformer Encoder, OpenCV

- **Model:** Combined ResNet50, Efficient Channel Attention (ECA), and a Transformer encoder to classify three femoral implant categories from hip X-rays.
- **Evaluation:** Evaluated on 2,744 images, achieving 93.37% test accuracy.

User Management System

Java 17, Spring Boot, Spring Security, Spring Data JPA, Hibernate, PostgreSQL/MySQL, JWT, BCrypt, Maven

- **Features:** Built registration, authentication, and user management APIs with JWT, BCrypt, and role-based authorization.
- **Maintainability:** Added persistence, CRUD operations, DTO mapping, input validation, and centralized exception handling.

Achievements & Certifications

- LeetCode: 200+ problems solved.
- Freelance: Landing page for a construction builder.
- Sixth Sense Robotics: 1st place; workshop.
- Assembled a mini drone.
- Data Structures and Algorithms using Java — NPTEL, IIT Kharagpur (Jul–Oct 2024).
- Sixth Sense Robotics — Genesis EduTech, PSNA College (Oct 2023).
- Paper presentation: Deep Hybrid Model-Based Automatic Femoral Stem Classification in Hip Arthroplasty — UNICOTRIPS-26 (8 May 2026).
